EDUCATION

Georgia Institute of Technology, Atlanta, Georgia

May 2028

Bachelor of Science in Computer Science, Threads: System Architecture and Cybersecurity

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Organization & Programming, Objects & Design, Human Dimension of Cybersecurity

TECHNICAL SKILLS

Languages– Python, Java, Assembly, C, C#, HTML/CSS, Nix, Bash, Rust

Frameworks– Django, Bootstrap, Node.js, Selenium

Tools– Git, Unity, Neovim, RHEL, AWS

Certifications – CompTIA Security+, Unity Certified Associate Developer, Centipoint IT Specialist

WORK EXPERIENCE

Improving LLC, Atlanta, GA – *Web Developer Intern*

Nov 2024 – May 2025

- Assisted in developing responsive websites using TypeScript, React, and Next.js, following team coding standards and best practices.
- Helped implement and parse data from external APIs, learning to handle asynchronous requests and format JSON responses for dynamic front-end displays.
- Used Git for version control, practicing branching, committing changes regularly, and collaborating with team members via pull requests.

Look, Inc., Remote — *Web design & Data intern*

Oct 2023 – May 2024

- Assisted in designing website outlines, user flows, and clickable prototypes using Figma to visualize layout and navigation before development.
- Generated dynamic website content (charts, metrics, summaries) using data gathered from Grafana, translating complex telemetry into user-friendly formats.

PROGRAMMING PROJECTS

CS 2340 Hackathon Project | JavaScript, Agentic Workflows, Github Pages

Mar 2026

- Built and deployed a responsive web application using modern frontend frameworks with AI-assisted UI generation.
- Implemented dynamic components, user interactions, and structured page layouts to improve overall usability.
- Leveraged AI-powered development tools to accelerate prototyping and interface design, placing in the top 3 in the hackathon.

NixOS Home Server & Template | Nix, Docker, Git, Linux

Jun 2025 – Present

- Configured a home server using NixOS to ensure system reliability and reproducible configurations.
- Implemented security measures including firewall rules, SSH hardening, Systemd settings, and Linux kernel hardening.
- Managed Docker Compose for containerized services, along with port-forwarding, DNS configuration, and HTTPS setup.
- Created a barebones template to simplify server setup for beginners, reducing onboarding friction.

FencingTimeLive Web Scraper | Python, Selenium, JSON

Oct 2024 – Apr 2026

- Automated browser-based data collection using Python and Selenium, simulating user traversal through dynamic fencing tournament websites.
- Scraped historical fencing results from FencingTimeLive, then cleaned and parsed the data into JSON for further processing.
- Performed statistical analysis on the scraped dataset to develop a custom Elo-based ranking system, adapted from chess rating principles for fencing performance.

LEADERSHIP AND COMMUNITY ENGAGEMENT

Athlete, Yellow Jacket Fencing Club at Georgia Tech

Sep 2025 – Present

- Competed as a member of a fencing team at local and national events, developing strong collaboration and communication skills in high-pressure environments.
- Collaborated with teammates to analyze opponents' strategies and adjust tactics in real time, building analytical and quick-decision-making abilities.

ADDITIONAL SKILLS AND INTERESTS

Languages: English

Interests: Fencing, Weightlifting, Linux
